Symbols

NEW

Over 150 exciting new products have been added to our line in 2016. Look for this symbol!

HOT SELLER

This icon identifies products that are among our top sellers.

The RP symbol indicates all products that are available in attractive retail packaging. For details, see pages 281-281.

This icon helpfully indicates products that should be hand-washed only. For details, see pages 278-279.

Items that are shipped knocked down are easily identified by this symbol.

This logo is placed next to all products manufactured in the United States of America.

This logo indicates a product made in a North American Free Trade Association member country.

It is with great appreciation that we thank Chef Paul Larson of Blue Plate Catering for his collaboration with us on menu selection, recipes and presentation ideas for some of our key photos (most notably our cover shot). His expertise was invaluable. Thank you!

Mini Tip

Chalk Markers

The secret to great signs is not so much the artists's talent but the tools employed. These markers write on all Securit® chalkboards, glass, mirrors, plastics, metal and all other non-porous surfaces. They are rain-resistant, smear-proof, and clean with just water and cloth. With this fabulous assortment of markers, anyone can create attractive marketing displays!

Vidacasa by American Metalcraft

Vidacasa by American Metalcraft is the first temperature-controlled buffetware that **works independently of electricity, cords, gels, fire or ice**. It was developed for chefs and caterers who need modern, safe and efficient ways to keep food hot or cold, indoors or outside. Designed for buffet presentations, Vidacasa features a variety of modular bases, plates and accessories. Each piece in the line can accept both iThermo hot and cold cells for consistent food temperatures.

The Combinations Are Endless...

Completely modular, Vidacasa includes components that can mix and match with one another quickly to change up buffets. You can easily change from cold appetizers to hot entrees to cold desserts. With different iThermo cells, you can serve hot and cold food in the same buffet line. Mix in other American Metalcraft platters, bowls and casseroles and you can update buffet lines in minutes!

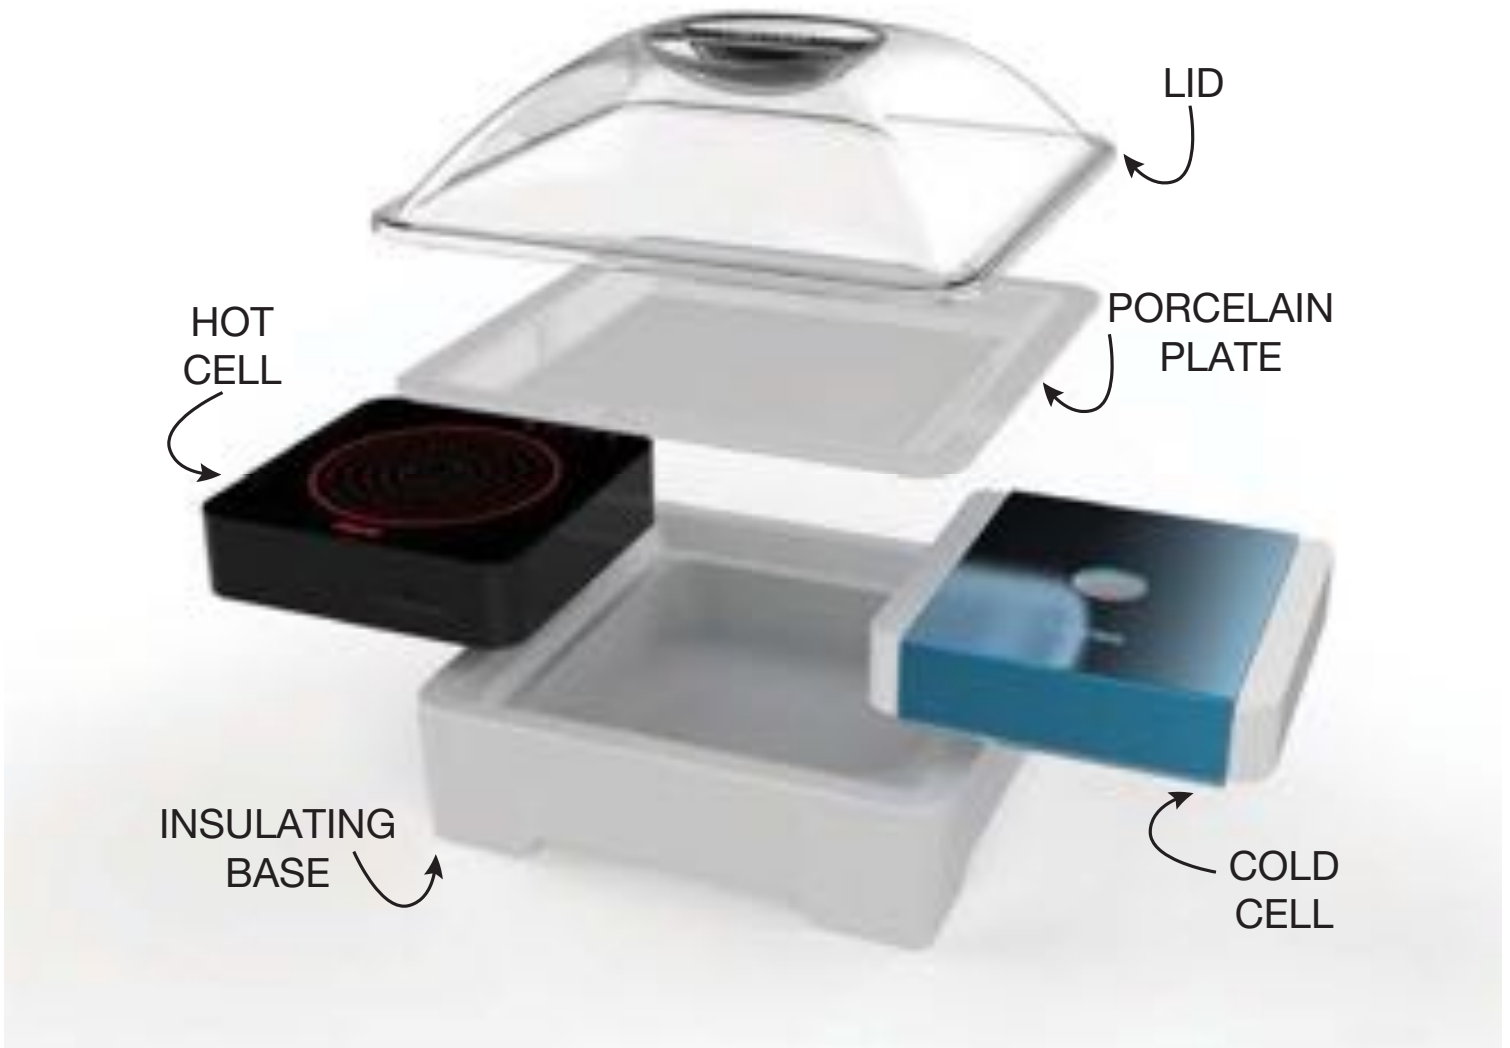

BUFFET TABLE

Build It Yourself!

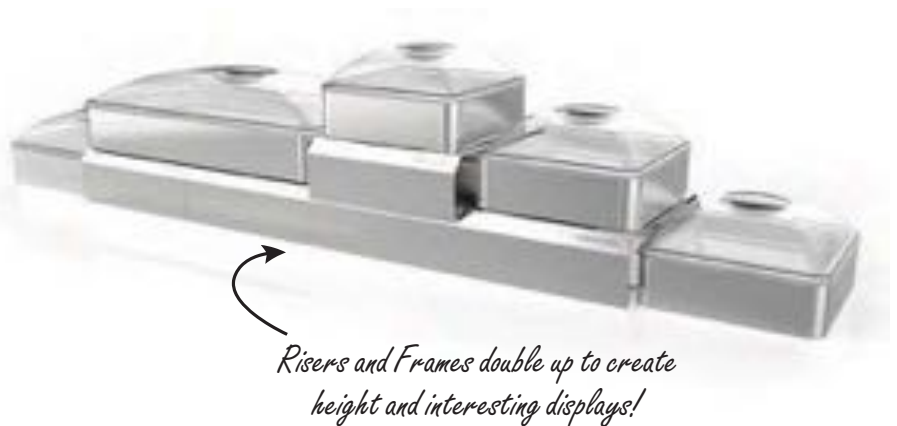

It's never been easier to build a buffet! With so many components available, just choose the combination that works best for you.

Pick a Base —————> **Pick a Hot or Cold Cell** —————> **Pick a Plate(s)** —————> **Pick a Lid**

Now Let's Accessorize!

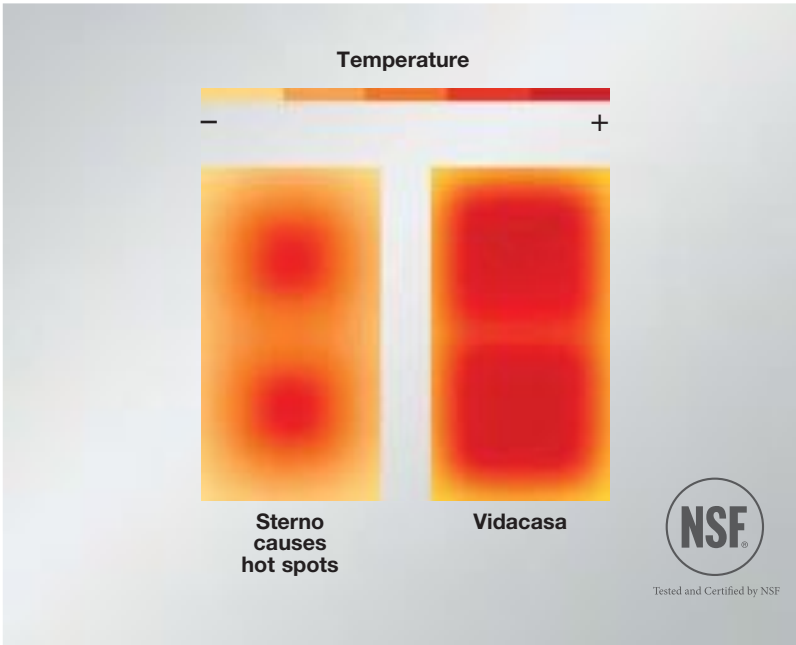

Depending upon your needs, you can pair up one large plate to serve a main entree or use two plates for multiple food options. Then choose stainless steel frames and risers to complete the look of your buffet. The modularity is never ending!

Hot Technology

Eliminate open flames and diminish the risk of fire with Vidacasa! Unlike induction heat, Vidacasa Hot Cells are cordless and portable, making buffet presentations extremely flexible. The design is perfect for serving a variety of dishes, large or small, to any sized event.

Unique thermal engines are at the heart of the Vidacasa system, providing maximum transformation of electricity to heat. The heat energy is conducted through the flat surface of Hot Cells, ensuring food stays warm efficiently and evenly.

A

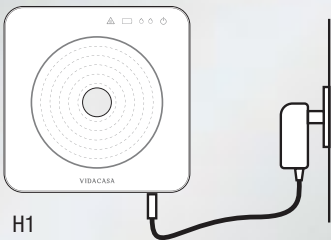

H1 Pro Hot Cell

Keeps food at optimal heat for up to 3 hours!

Recharge Hot Cells:

Direct Wall Mount Charging

Traditional Solutions

Vidacasa Solution

Sternos / Chafing Fuel	Vidacasa Hot Cell Buffetware
Placed outside the plates, visible presentation	Placed inside the base tray, elegant presentation
Fire hazard	Flexible and safe to use
Inconsistent performance	Excellent warming performance up to 3 hours*
Not reusable	Portable, reusable, safe and eco-friendly

A) iThermo® Hot Cell

- Depending on the setting, the Hot Cell will deliver constant temperatures of 176° F (80° C) or 230° F (110° C)
- Cordless performance of up to 3 hours. Cell can be used with charger for continuous heat
- Recharge cell by connecting directly to a wall outlet (charger included)
- Hot Cells can be used inside Vidacasa bases, with chafers and griddles to keep food at optimal temperatures

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price
H1	Pro Hot Cell 8" Sq. x 2" H (20.3 x 5.1 cm)	6	2.24	31	920.00 Ea

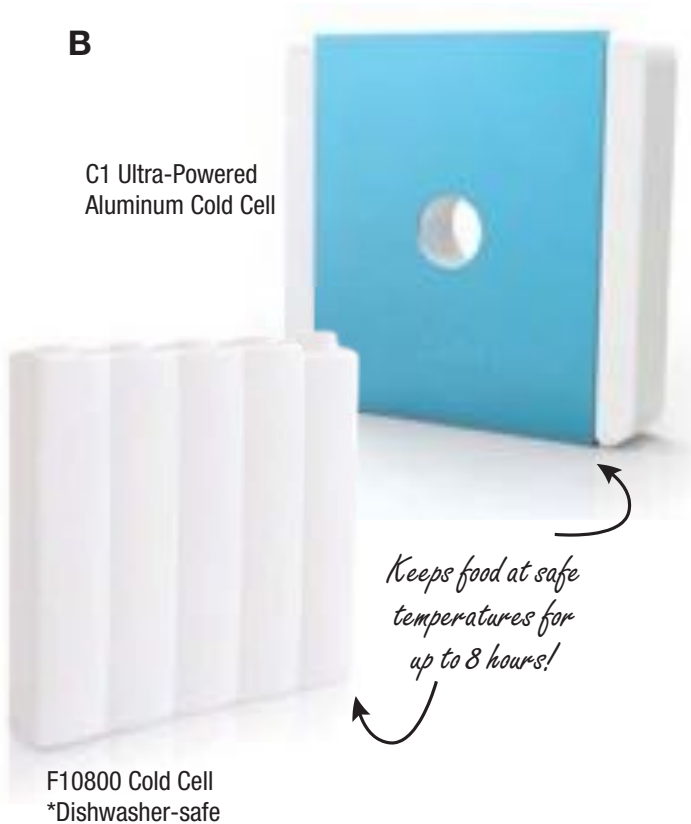

*Cordless performance of up to 3 hours. Cell can be used with charger for continuous heat.

Cold Technology

Keep food colder longer with Vidacasa Cold Cells! Developed for NASA to help keep astronauts at a constant temperature during space walks, the cooling technology is conducted through the flat surfaces of the Cold Cells efficiently chilling food.

Vidacasa Cold Cells far outperform wet ice, blue gel and ice packs. They are ideal for presenting chilled food ranging from salads and cold appetizers to cool desserts. Cold Cell contents are non-toxic, food-safe and comply with USA, BS EN and FDA standard tests.

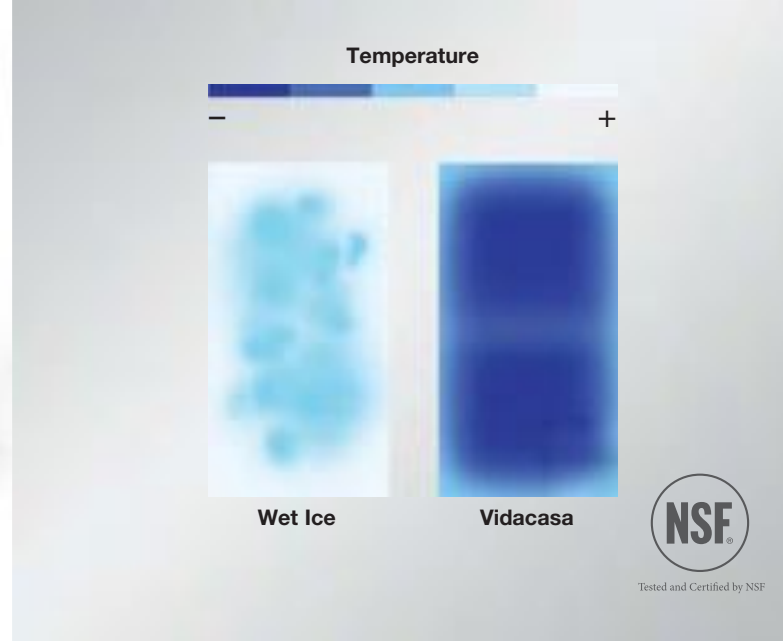

Deliver constant temperature

14°F
-10°C

8 hr

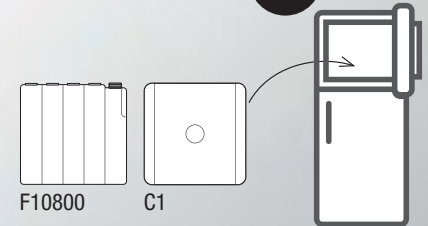

Put in freezer to recharge

up to 1,200 times

Recharge Cold Cells:

- Recharge in 0° F (-18° C) freezer
- Recharge time: 24 hours
- Each cell can be recharged up to 1,200 times

24 Hours

B) iThermo® Cold Cells

- Cold Cells deliver a constant temperature of 14° F (-10° C)
- Cells maintain temperature for up to 8 hours
- Recharge cells for 24 hours in a 0° F (-18° C) freezer
- Cold Cells can be used inside Vidacasa bases, in party tubs and pails to keep food and beverages cold

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price
F10800	Cold Cell 7" L x 8" W x 1" H (17.8 x 20.3 x 2.5 cm)	6	0.42	15	32.00 Ea
C1	Ultra-Powered Aluminum Cold Cell 8" Sq. x 2" H (20.3 x 5.1 cm)	6	0.50	20	82.00 Ea

NOTE : The performance of the VIDACASA Cold Cell will not directly correlate to the temperatures of food on the plate surface, due to the density of food types, indoor / outdoor elements, and other external variables. On average, while using wet ice, food will only stay at a constant temperature of 41°F (5°C) or below for 8 minutes. With the VIDACASA F10800, food will stay at a constant temperature of 41°F (5°C) or below for 49 minutes, and with the VIDACASA C1, food will stay at a constant temp of 41°F (5°C) or below for 132 minutes. Full test results are available upon request.

Traditional Solutions	Vidacasa Solution
Wet ice / dry ice / blue gel with normal plate	Vidacasa Cold Cell Buffetware
Unsophisticated presentation	Elegant presentation
Poor performance	Outstanding cooling performance
Not reusable	Reusable, eco-friendly
Dry ice is dangerous and toxic	Food-safe and non-toxic

Pizza Peel Wood Oil

Wood pizza peels should never be used under heat lamps or soaked in water. If necessary they can be seasoned or sealed with oil. To seal, wipe any food safe oil (like mineral oil) on the surface of the peel. Some oils will eventually go rancid; these oils should be avoided. If sealed, the peel is less likely to pick up unwanted odors, food particles and moisture. This will not increase the life span of the peel. Peels eventually wear out. If peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving on hot surfaces, which could increase chance of warping. Pizza peels are not dishwasher-safe.

*Some plates with wide bases may not fit into the category their outside diameter indicates. In these cases covers in a larger category may be required to insure stacking.

** A finger hole is not available for plates between 4½" and 5".

- Sample plates required with all new orders for custom sizing
- If we have your customer's plate to measure, in most cases we guarantee our covers will stack with your customer's china
- **Minimum order 24 pieces**

Custom Plate Covers

The Perfect Fit, Time After Time

To achieve the perfect fit, a sample plate is required. Plate covers are then custom-fit over the rim of the plate.

Manufactured from durable stainless steel, American Metalcraft plate covers are heat-retaining, odor-resistant, and they won't chip, crack, flake, burn or melt. Most styles have a finger hole. The standard finish is polished on the sides and satin on the top. All satin or all mirror finish are also available.

1. Plate covers are custom fitted over the rim of the plate with allowance for some normal size variation in commercial china. Covers are approximately 2" (5.1 cm) high over the rim of the plate. Extra high and lower height covers are also available (see p. 187).
2. Sample plates are required with all new orders for custom sizing. In most cases we guarantee our covers will stack with your customer's china.
3. To ensure secure stacking, a "crown" is formed in the top of the cover that matches the foot of the plate. This stacking feature offers safe multiple meal carrying and cuts down on serving time.

Washing Instructions

Covers are manufactured using food-safe compounds and will require initial hand washing with a degreasing detergent. Always thoroughly dry plate covers after washing. Never store them damp.

Ordering Tips

1. Since commercial china will vary in size, it is best to have the china company provide a sample for plate cover sizing. This assures us of furnishing a cover that fits over the rim of the plate properly and also enables us to custom design a "crown" on the top of the cover for solid stacking.
 2. Send the sample plate(s) to American Metalcraft with your purchase order for pricing confirmation. Only prices quoted after receipt of sample plate(s) are guaranteed.
 3. Some plates and oval platters with wide bases and oblong platters may not fall into the category indicated by their top outside dimensions.
 4. Custom fit covers are manufactured approximately ⅛" larger than the sample plate provided. This will allow for some normal variation in the size of the china.
 5. Most plate cover reorders should reference a previous order or an American Metalcraft invoice number.
 6. Custom made covers are non-returnable.
- Note: If you have china from more than one manufacturer, or from different lots, make sure you measure 5 from each and submit the largest and smallest of each.

Extra High

Lower Height

B) Extra High Round Banquet Covers

Approximately 3" (7.62 cm) high over rim of plate. Stainless Steel. Available for plates 10" or larger. Can be custom designed for solid stacking. **Special order only. Sample plate required. Minimum order 24 pieces.**

Description	List Price

Sample plate required with every new order.

A) Oval Custom Fitted Stainless Steel Plate Covers

For any size or make ceramic, plastic, metal or glass oval plate. From 9½" (24.13 cm) to 16" (40.64 cm) long. Constructed of stainless steel with beaded rim. Covers custom sized directly to plate for proper nesting and solid stacking; this guarantees a perfect fit.

Please contact us for a quotation on oval and oblong plate covers. The information below is a guide only.

Ceramic plates have a tendency to warp during manufacturing. We cannot guarantee our oval covers will stack solidly if this condition exists.

Item No.	Description	Wt.	List Price
OV1100S	For Narrow Body Plates – for plates approx. 9½" to 11" L (24.13 to 27.94 cm) Minimum plate width 6⅞" (17.46 cm)	12 Lb/Dz	67.00 Ea

OV1550S	For Wide Body Plates – for plates approx. 13" to 16" L (33 to 40.64 cm) Minimum plate width 9⅞" (24.45 cm)	30 Lb/Dz	76.00 Ea

The above sizing information is for reference and information. Additional smaller sizes may be available. Please call to insure you have priced your Oval Plate Covers correctly. Incorrectly priced Oval Plate Cover orders cannot be filled without written authorization to proceed at correct price. Some oval plates with wide bases and oblong plates may not fall into the category indicated by their top outside dimensions.

Minimum order 24 pieces.

Special Finishes and Markings for Oval Plate Covers

E) Standard Insulated Thermo-Dri Hot Food Bases

Custom fitted plate holding bases with separate pellet for plates between 8 13/16" to 12 3/4". These bases are made from stainless steel and double walled to provide excellent insulation and heat retention. The separate aluminum pellet fits snugly into a specially designed well inside the base. Since only the pellet is heated, the base remains cool to the touch while the food stays hot. **Minimum order 24 pieces.**

Thermo-Dri Bases - Sample Plates Required

Category	Description	Wt.	List Price
TB60	For Plates 8 13/16" to 9 3/4" Dia. (22.4 to 24.8 cm)	17 Lb/Dz	48.00 Ea

D) Corkscrews

Our wing corkscrew offers a deluxe finished, heavy duty "professional" corkscrew, with plastic bottle rest. Just turn screw into cork as usual, wing levers will rise, then simply depress levers and the cork will lift out easily.

Choose from 4 styles of our waiters' corkscrews. A premium brushed stainless steel corkscrew with a curved body, a black plastic handled corkscrew, a style with a curved knife or one with a straight knife.

The pocket corkscrew is portable and affordable. This two-piece plastic corkscrew with stainless steel auger tucks safely away when not in use.

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price

A

A Guide to Our Pizza Trays

A) Aluminum Pans

Aluminum pans are available in two weights. Standard Weight pans are 18 ga., .040", 1 mm aluminum and Heavy Weight pans are 14 ga., .064", 1.5 mm aluminum; Heavy Weight pans are 50% heavier than Standard Weight. Standard Weight pans are usually designated with an "A" as either the prefix or suffix in the item number and Heavy Weight pans are usually designated with an "HA" as either the prefix or suffix in the item number. Hand wash is recommended as aluminum is a soft metal that is attacked by detergents with a high alkaline or acidic nature. Hand wash with detergents made specifically for aluminum. Through repeated use aluminum will soften and if scoured, will thin.

Aluminum Pan

B

B) Tin Plate Pans

Tin Plate should be seasoned before use and may need periodic reseasoning. Tin Plate will darken with use and will rust if refrigerated, soaked in water or left unseasoned in damp environments. Wipe dry immediately after hand washing. Tin Plate pans are designated with a "T" as either the prefix or suffix in the item number.

To Season Tin Plate Pans

To season, wash in warm, soapy water and quickly dry. Brush oil on inside and outside surfaces of the pan and bake to a golden or dark brown. When seasoning, bake at regular times and temperatures. Some pans may need a second or third coating before being fully seasoned.

C) Hard Coat Pans

Hard coat pans are made from Heavy Weight aluminum. Perf and SuperPerf hard coat disks are made from Standard Weight aluminum. Hard Coat pans are usually designated with an "HC" as either the prefix or suffix in the item number. Hard coat anodizing is a synergistic electro-chemical process that converts the surface of aluminum into aluminum oxide. The aluminum oxide is a dark color. This finish is hard and will not flake off. However, the aluminum underneath is soft and through repeated use the pan will soften. If scoured, the pan will thin. Hardcoat pans are not non-stick and must be seasoned. Hand wash only.

To Season Hard Coat Pans

Wash and dry the pan thoroughly, wipe oil on the inside and outside surfaces of the pan, and allow to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not over bake and do not wash off excess oil, just wipe. The oil residue, and any additional oil added before baking, allows the pan to develop non-stick properties. Remember when cleaning hard anodized aluminum, this is considered an amphoteric coating and will be attacked by solutions of a high alkaline or acidic nature. Do not expose these pans to dishwashers or caustic cleaning solutions. Hand wash with detergents made specifically for aluminum.

Please note:

In our catalog are thousands of different pizza trays and tens of thousands of different combinations of styles, depths, materials and options. **These pans are made to order; they are not stocked.** It is possible that your special order pan has never been made previously or has only been made once or twice. **Consequently, special order pans, once ordered, cannot be cancelled or returned.** Please review and re-confirm the tray you are ordering. If you have any questions, please call and, if necessary, request a sample. **Orders for special order pans cannot be cancelled. Special order pans are not returnable.**

Unseasoned Tin Plate Pan

Seasoned Tin Plate Pan

C

Hard Coat Pan

D) Nibs

Any round or square pizza tray or pan we manufacture, 2" (5.1 cm) deep or less, up to 20" (50.8 cm), can be furnished with Nibs. To order, use the regular item number and add the prefix "N." Also note in the body of the order that the pans should be made with Nibs. The Nibs are approximately 5/8" (15.9 mm) diameter and raise the pizza about 1/8" (3.2 mm) above the surface of the pan. Raising the pizza off the surface allows moisture to escape and a fresher, crispier pizza may result. Pans with Nibs cannot be Perf or SuperPerf. Refer to the tray or pan style for more information and for pricing information.

E) Perf

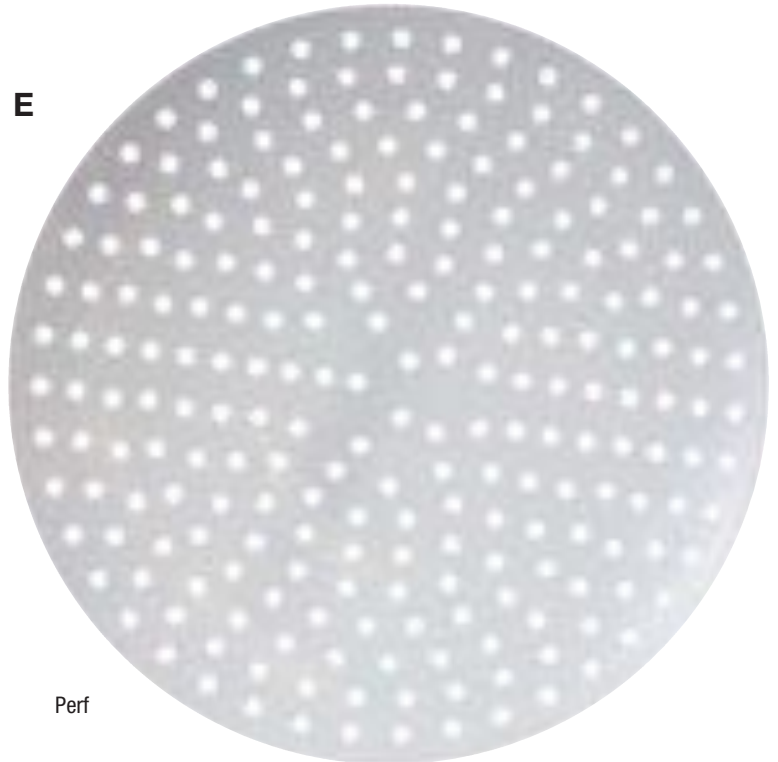

Any round or square pizza tray or pan less than 21" (53.3 cm) in diameter can be Perforated. To order, use the regular item number and add the suffix or prefix "P." Also note in the body of the order that the pans should be Perforated. These pans cannot be made with Nibs. Perf pans allow the bottom of the pizza to cook faster and can provide a crispier crust. Perf pans can also be used to keep cooked pizzas fresher by allowing moisture to escape. Refer to the tray or pan style for more information and for pricing information. All holes are 3/8" (9.5 mm) diameter.

F) SuperPerf

Any round pan less than 21" (53.3 cm) in diameter can be SuperPerf. To order, use the regular item number and add the suffix SP. Also note in the body of the order that the trays or pans should be SuperPerf. These pans cannot be made with Nibs. For the same diameter, SuperPerf pans have twice as many holes as Perf. SuperPerf allows the bottom of the pizza to cook faster and can provide a crispier crust. SuperPerf can be used to keep cooked pizzas fresher by allowing moisture to escape. All holes 3/8" (9.5 mm) diameter. Refer to the tray or pan style for more information and for pricing information.

Mega Hard Coat Anodized CAR Pan

Mega CAR Pan

B) Mega Screens - Aluminum

The only pizza screens tough enough to exceed the high standards of NSF, Mega Screens are the smart choice. Holes and open rims make cleaning a breeze and improve food safety. Available in aluminum or hard coat anodized aluminum, Mega Screens can last 5 to 10 times longer than standard pizza screens. Hard coat Mega screens are the most durable, cost-effective screens for conveyor oven use. Holes are $\frac{3}{32}$ " (0.24 cm) diameter.

A) TP Series Wide Rim Pans

There's a reason why other pizza supply manufacturers imitate, but never duplicate American Metalcraft's product line. When it comes to durability and reliability in pans, American Metalcraft offers the best value. The TP Series of Pizza Pans is manufactured from heavy duty 14 and 18 gauge aluminum. These gauges of aluminum contribute significantly to a longer life. With so many styles and sizes from which to choose, American Metalcraft has built a solid reputation as a quality manufacturer for the pizza industry since 1947.

B) CTP Series Coupe Style Pans 

Just like the TP Pizza Pans, these CTP Pans are manufactured from the finest grade of aluminum. It's really pretty simple. The harder materials used in our pans last longer than less expensive alternatives in the marketplace.

Pan Size	CTP Standard Weight 18 Ga., 1 mm Aluminum				
	Item No.	Pack	Cu. Ft.	Wt.	List Price

D) 7000 Series

7000 Series are stacking covers for DEP, 2000 and 9000 pans, covers for the top of a stack for 5000 and 5100 pans, or as covers only for 4000 and 8000 pans. Only tapered pans can be made to stack with 7000's.

If you know the AM item number of your pan, look for it on the list. If you don't know the number, measure the top inside diameter of your pan and find the 7000 series cover with the largest smaller ID.

Wood Peels and Boards should be wiped with a damp cloth. Never soak with water!

Pizza Peel Wood Oil

Wood pizza peels should never be used under heat lamps or soaked in water. If necessary they can be seasoned or sealed with oil. To seal, wipe any food safe oil (like mineral oil) on the surface of the peel. Some oils will eventually go rancid; these oils should be avoided. If sealed, the peel is less likely to pick up unwanted odors, food particles and moisture. This will not increase the life span of the peel. Peels eventually wear out. If peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving on hot surfaces, which could increase chance of warping. Pizza peels are not dishwasher-safe.

Care and Use

Endurance™ Melamine Bowls and Platters

This nearly indestructible line of melamine is long-lasting when cared for properly. It is not recommended for microwave use and should be washed only in the top rack of the dishwasher.

Regarding serving suggestions, we do not recommend any citric, acidic or strong-colored food products that would have direct contact with melamine. These products can cause staining over time. PET liners that can protect melamine from staining are available.

Cast Iron

Before first use, fill pan with water, bring to a boil, and wipe dry. After washing, seasoning is required. To season, apply a thin coat of melted shortening with a soft cloth. Apply shortening inside and out of pan and lid. Place pan/lid upside down on top shelf of a preheated 350° oven for one hour.

To clean, hand wash with a mild detergent and warm water. Never use cold water as that can cause pans to crack or warp. Do not expose to dishwasher, abrasive sponges, bristles, caustic cleaners, or acidic detergents. Use a small amount of cooking oil inside pan prior to each use and re-season when necessary.

Wrought Iron Griddles

Prior to using your American Metalcraft Griddle for the first time, hand wash with a mild detergent and warm water. Then dry thoroughly with a soft cloth. Do not expose wrought iron griddles to a dishwasher,

abrasive sponges, caustic cleaners, or acidic detergents.

Hammered Copper, Bamboo and Wrought Iron

As beautiful as these lines are, they require special attention when cleaning. Please hand wash only with a soft cloth. Do not scour with steel wool or abrasive cleaners. We recommend our Copper Polish for hammered copper sold on p. 279.

Wood Peels and Serving Boards

Wood pizza peels and serving boards should never be soaked in water, even for a few minutes. To clean, simply wipe down with a damp cloth and allow to air dry. They can be seasoned or sealed with oil. To seal, wipe any food

safe oil such as mineral oil on the surface of the peel. We recommend our Wood Oil sold on p. 267. If sealed properly, the peel is less likely to pick up unwanted odors, food particles, and moisture. If a peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving peels on hot surfaces. This increases the chance of warping.

Vidacasa by American Metalcraft Hot and Cold Cells

To clean, wipe with water and a soft cloth. Do not submerge in water or expose to dishwasher, abrasive sponges or detergents. To recharge, reference pages 28-29.

Lids and Insulated Polyurethane Bases

To clean, wipe with water, mild detergent and a soft cloth. Do not expose to dishwasher, abrasive sponges or acidic detergents.

Securit® Signs

To erase Securit Chalk Marker messages on Table Boards, Chalkboards, Wall Boards, Sandwich Boards and Bottle Displays, wipe with a soapy cloth followed by a clean cloth.

Galvanized Pails and Tubs

To clean, hand wash in warm water with mild detergent and dry quickly. Do not expose to dishwasher, abrasive sponges, bristles, caustic cleaners or acidic detergents. Do not refrigerate, soak in water or use with acidic foods.

Carbon and Black Steel Pans

Seasoning is recommended. To season, wipe interior of pan with flavorless cooking oil and heat empty pan. When surface becomes hot, remove from heat and allow pan to cool. Repeat this process twice. Color of pan will change to a darker finish. This indicates that pan has gained a natural, non-stick protection.

To clean, hand wash in hot water with mild detergent. Dry with paper towel or place in warm oven for a few minutes. Store in dry place. Do not expose to dishwasher, abrasive sponges or acidic detergents. Not suitable for microwave.

Caution: Flat iron handle is not heat-resistant

Pizza Trays and Pans

To ensure a longer life, always use special care with American Metalcraft Pizza Trays and Pans.

Aluminum Pans and Trays – Aluminum is a soft metal that is attacked by detergents with a high alkaline or acidic nature. Use detergents made specifically for aluminum. Through repeated use, aluminum will soften and, if scoured, will thin.

Tin Plate Pans – Tin plate should be seasoned before use and may need periodic re-seasoning. Tin plate will darken with use. Tin plate will also rust if refrigerated, soaked in water or left unseasoned in damp environments. Never soak in water. Wipe dry immediately after hand washing.

To Season Tin Plate Pans – Wash in warm, soapy water and quickly dry. Brush oil on inside and outside surfaces of the pan and bake to a golden or dark brown. When seasoning, bake at regular times and temperatures. Some pans may need a second or third coating before being fully seasoned.

Hard Coat Pans – These pans are made from heavy weight aluminum. Hard coat anodizing is a synergistic electro-chemical process that converts the surface of aluminum into aluminum oxide. The aluminum oxide is a dark color. The finish is hard and will not flake off. However, the aluminum underneath is soft and, through repeated use, the pan will soften. If scoured, the pan will thin. Hard coat pans are not non-stick and must be seasoned. Hand wash only.

To Season Hard Coat Pans – Wash and dry pans thoroughly. Wipe oil on the inside and outside surfaces of the pan and allow it to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not over-bake and do not wash off excess oil. Just wipe. The oil residue and any additional oil added before baking makes the pan stick-resistant. Do not expose these pans to dishwashers or caustic cleaning solutions. Hand wash with detergents made specifically for aluminum.

Pizza Stones

This “all-natural” stone is freezer, microwave and oven-safe. It requires no seasoning or conditioning. Simply rinse in warm water before first use and allow the stone to dry thoroughly. Most recipes suggest preheating stone 15 to 20 minutes for even cooking and to reduce baking time. To prevent cracking, avoid temperature extremes from direct to oven or from oven to cold water. Do not place stone over an open flame or in a broiler. Do not cut directly on stone. Before cleaning, allow to cool completely. Then remove baked-on foods and rinse in warm water. To avoid soapy aftertaste, do not use soap or detergent. Do not soak the stone or clean in a dishwasher. The pizza stone will darken gradually and retain some staining with use. These are a part of the stone’s natural seasoning and will not harm it or affect the taste of the food. Handle the stone with care to prevent chipping or breaking.

Cleaning Products

To make your product care and maintenance as easy as possible, American Metalcraft offers this quality line of cleaners, polishes, oil and scratch removers. Use these on a regular basis to improve the look and extend the life of your American Metalcraft products.

Item No.	Description	Pack	Cu. Ft.	Wt.	List Price
